FIREPLACE XTRORDINAIR™
Imagine a Fireplace for Every Room

564 E Matrix Face

95400488

Compatibility:

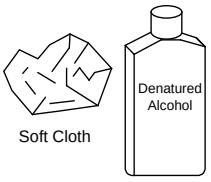
- 564 Electric Fireplace

Packing List:

- Matrix Face
- Heat Shield

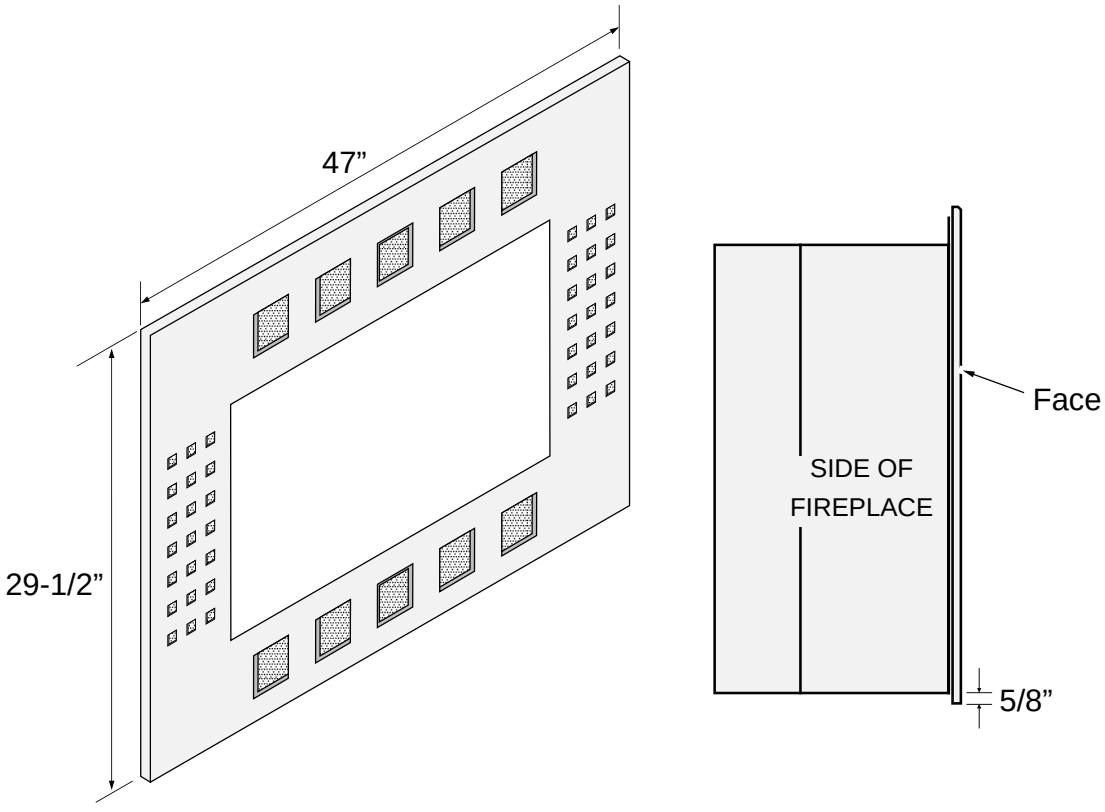
Plated Surfaces

Use denatured alcohol and a soft cloth to clean plated surfaces. Marks left on the surface may damage the face.



Installation Notes

This face will not work with the Travis Mantel. The face extends 5/8" below the base of the fireplace and is 47" wide (too wide for the mantel). When building an enclosure for the fireplace, make sure to raise it a minimum 3/4" above the flooring surface (typically 18" or higher).



Re-Painting the Back Panels

This face has removable back panels that may be re-painted to suit your interior decor. They may be re-painted using high temperature paint (400° engine enamel paint). Prepare the surface using a Scotch-Brite ® pad to insure proper paint adhesion.

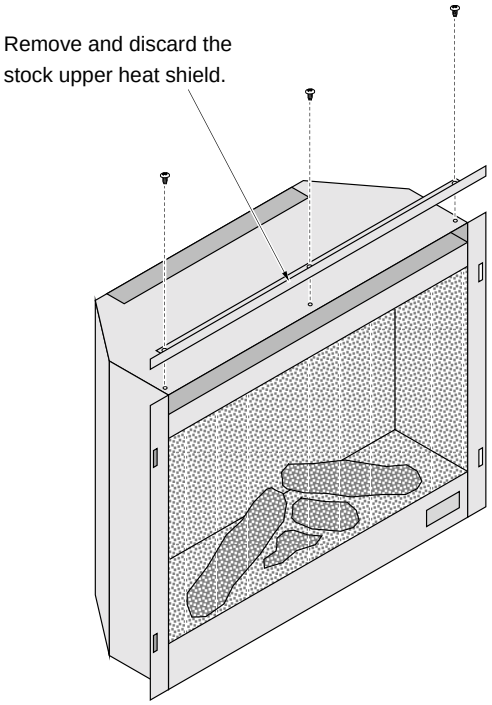
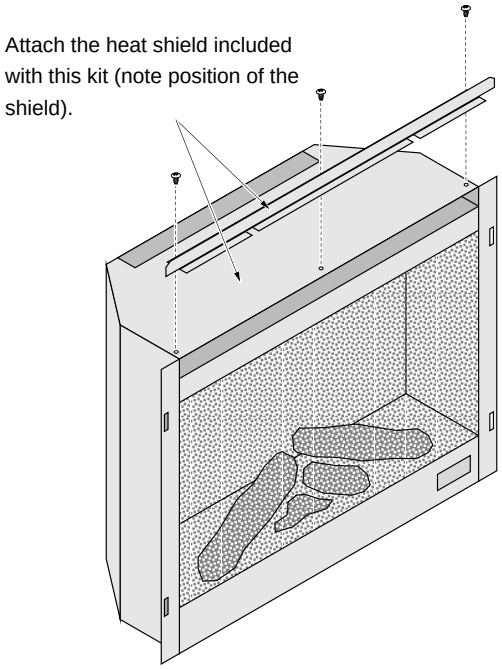
Installation

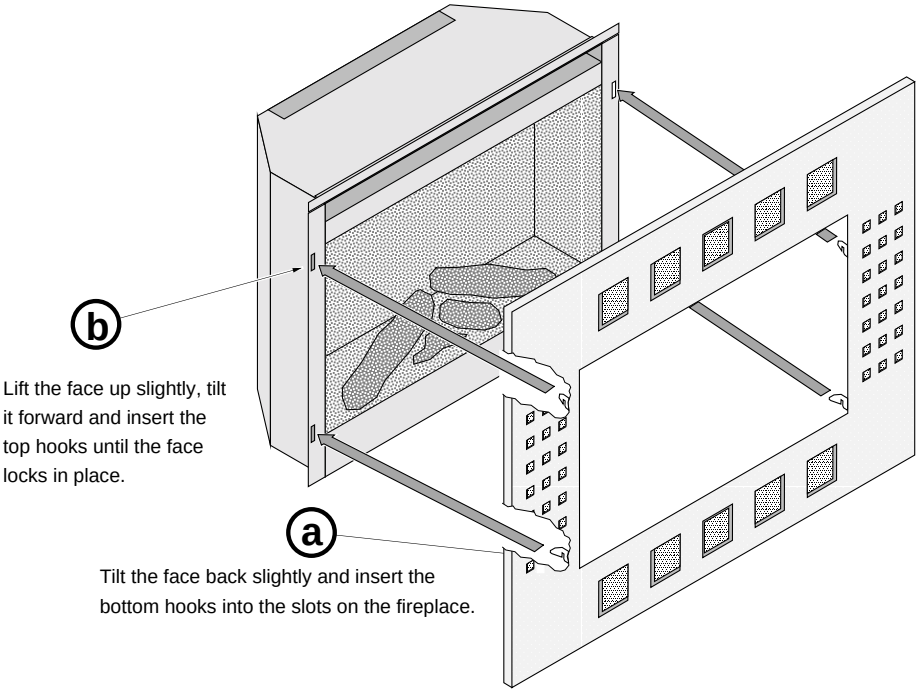
NOTE: We recommend pulling the fireplace out a couple of inches while installing or removing the face to insure the hooks on the face fully engage the slots on the fireplace.

1 Install the heat shield following the directions below.





2 Attach the face following the directions below.



b
Lift the face up slightly, tilt it forward and insert the top hooks until the face locks in place.
a
Tilt the face back slightly and insert the bottom hooks into the slots on the fireplace.
